I am a full-stack web developer who uses my experience in instructional design and media to create clear, engaging user experiences. I am a lifelong learner as well as a strong collaborator who thrives on a team. I love learning a system inside and out, and I love designing a system even more.

Education

University of Denver (2017-2018)

Certification in Full-stack Web Development from University of Denver Coding Bootcamp. Anticipated completion in April, 2018.

Ohio University (2007–2011)

B.A. in Linguistics with focus on Computer Assisted Language Learning. Minor in Russian.

Skills

Cross-browser compatibility, integrating user feedback, layout and typography, MERN stack, mobile web design, MVC architecture, ORMs, project management, quality assurance testing, responsive design, search engine optimization, security and session storage, semantic HTML, typography, state management, user authentication, user-centered design, video editing, video production.

Programming Languages, Frameworks, & Tools

Adobe Creative Cloud (After Effects, Audition, Illustrator, Photoshop, Premiere), AJAX, Bootstrap, Chai, CSS3, Express, Firebase, Git, Handlebars, Heroku, HTML5, Javascript, JSON, jQuery, Linux, macOS, Materialize, Mocha, MongoDB, Mongoose, MySQL, Nightmare, Node.JS, Passport.js, PHP, Python, React, RESTful APIs, Sequelize, Windows.

Projects & Freelance Experience

MoodMap. March, 2017. <https://protected-depths-46622.herokuapp.com/>

MoodMap is a mood and habit tracking app. Users will take a quick survey every day and their answers will be analyzed and presented as charts to help them track their responses over time.

- *Frontend:* Bootstrap
- *Backend:* Node, Express, MySQL, Sequelize, and Passport.js with bcrypt

Mushroom Match. February, 2017. <https://whispering-dawn-28472.herokuapp.com/>

Mushroom Match has a simple responsive interface using Materialize for a familiar user experience. Simply begin the brief survey, answer all ten questions, and find out which Mario character could be your soul mate!

- *Frontend:* Materialize, jQuery
- *Backend:* Node, Express

StudyBuddy. December, 2017–January, 2018. https://preaksneview.github.io/study_buddy/

What technologies are you using? HTML5, CSS3, CSS Grid, jQuery, RESTful APIs (Firebase, Google Maps API, Weather Underground API), SASS to create our study group scheduling app StudyBuddy.

- *Frontend:* Used CSS3, CSS Grid, HTML5, Javascript, and jQuery to create a clean, responsive front end that presents information clearly.
- *Backend:* Using RESTful APIs (Firebase, Google Maps, Weather Underground) to create a listing of open study groups and display their locations and weather conditions.

Work Experience

Rocky Mountain Public Health Training Center

at University of Colorado School of Public Health (Dec, 2017–Present)

Training Development Specialist

- Create course sites and course content for Public Health industry online training modules.
- Provide technical support to synchronous learning sessions using Zoom for web conferencing.

Motion Pixel Lab (May, 2017–Dec, 2017)

Video Editor (Part-time)

- Edited various promotional reels for Space Foundation in addition to local commercial spots.
- Provided web administration, data and design support for The Beer Drinker's Guide to Texas beer map and Drinker's Guide to Colorado guide book and websites.

University of Pennsylvania (March, 2016–May, 2017)
